

Connect to eduroam with **geteduroam**

Secure campus Wi-Fi using your Kabale University student email account.

Before you start You need internet access to install the app, your full KAB student email address, and your KAB email password.

Follow these four steps

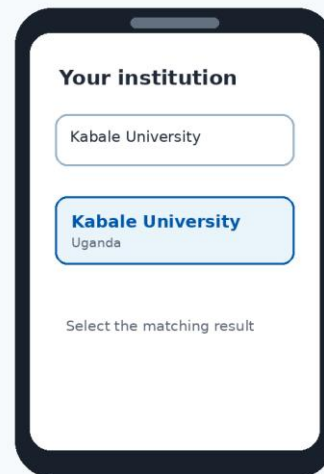

1 Install the app

Download geteduroam from Google Play or the Apple App Store.

Tip: install only the official app named “geteduroam”.

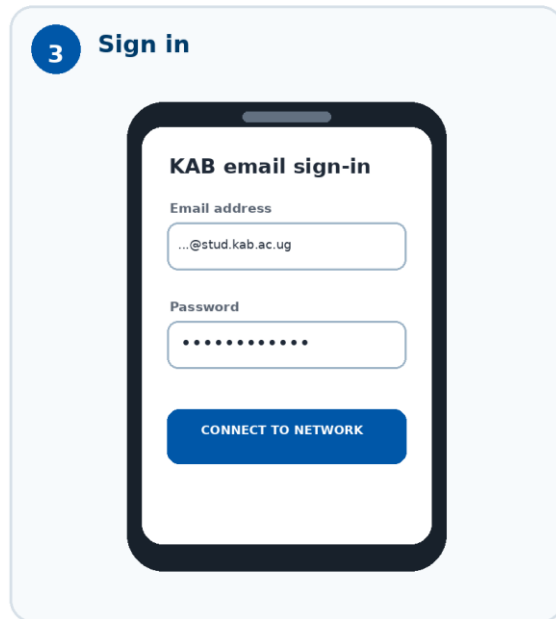

2 Find KAB

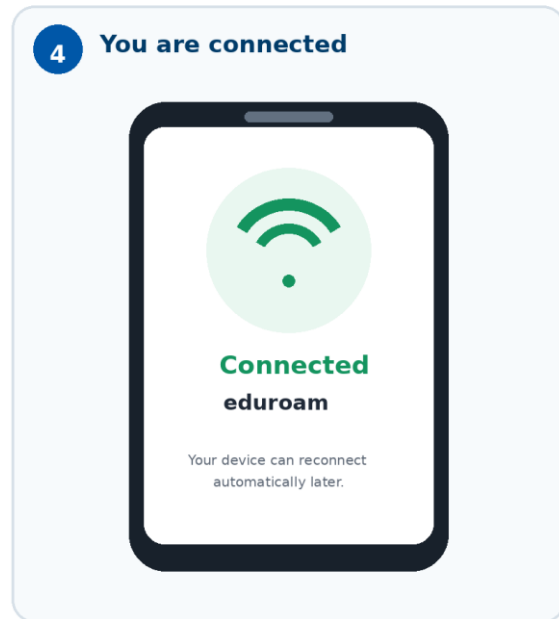

Open the app, search for Kabale University and select it from the results.

Sign in and connect

Enter your full KAB student email and KAB email password, then select Connect to network. Allow the requested Wi-Fi configuration.

When “Connected” appears, your device is ready and should reconnect whenever eduroam is available.

Example email format: **20206akms1234f@kab.ac.ug** (replace this example with your own KAB email address)

Important

Use the complete address

Enter your full student email, not only your student number.

Keep your password private

Never share your KAB email password or allow another person to configure the app for you.

If it does not connect

- 1 Confirm that your KAB email address and password work.
- 2 **Open** Wi-Fi settings, long-tap on Eduroam and Choose **forget or remove** any previously saved eduroam network, then try again in the app.
- 3 Make sure you selected Kabale University and accepted the requested Wi-Fi configuration or profile.
